

# Projects

ERRG was contracted by the U.S. Army Corps of Engineers to perform MEC construction support services during the construction of five training sites for the Infantry Platoon Battle Course (IPBC) on Camp Roberts Army Installation.

The range area is located within the impact area of Camp Roberts. Due to the use of this area over the previous 15 to 20 years as an IPBC, it was highly anticipated that construction crews would encounter potential explosive hazards. Therefore, MEC construction support personnel were required to be present during excavation activities to inspect soils as they were unearthed.

Prior to mobilization of crew and equipment, ERRG prepared a site specific Work Plan and an Accident Prevention Plan to be followed by all personnel during scheduled field activities.

During the early portion of field activities, a total of four 105mm High Explosive (HE) munitions were encountered and

subsequently disposed of by demolition operations. To prevent further occurrences of like items on remaining soils, ERRG's contract was modified to include the performance of a Mag & Dig operation on all remaining areas associated with the IPBC planned construction footprint.

The Mag & Dig operation resulted in the discovery of an additional seven MEC items requiring explosive demolition and was completed on the remaining areas within one week, allowing further construction activities to proceed without continued work stoppages due to additional MEC discoveries.

## MEC Construction Support Infantry Platoon Battle Course (IPBC) at Camp Roberts, California

### SUMMARY

Owner  
U.S. Army Corps of Engineers  
Sacramento District

Location  
Infantry Platoon Battle Course  
Camp Roberts, California

Award Date  
October 2008

Completion Date  
August 2009

Award Amount  
\$207,151

Final Contract Price  
\$247,549

Services Provided  
UXO Construction Support  
Work Plan Preparation  
Accident Prevention Plan Preparation  
Mag & Dig Clearance  
Blow in Place (BIP)

Engineering/Remediation Resources Group, Inc.
